PROJECTS & TALKS

Developing a Safer Web with Rust

At WebCamp Zagreb 2017, held a talk about the benefits of using Rust to build web services.

Kappa [Ruby, Docker]

Created an open-source tool for executing AWS lambda functions outside of AWS. The project got 60+ stars on GitHub.

European Universities Games 2016 Mobile Applications [Objective-C, Ruby]

Created and maintained the iOS application and the backend application.

Mr. Good Knight [Ruby]

Designed and implemented the backend application which offers a full self-publishing solution similar to Microsoft's Word or Powerpoint. This includes a wrapper around ImageMagick that enables PDF generation in the CMYK colorspace and a horizontally self-scaling PDF generator.

Museum of Broken Relationships [Ruby]

Designed and implemented a JSON::API standardised API backend that is consumed by a React / Redux frontend.

JoinPapa [Elixir]

Lead re-organization, rewrite and migration of the project's initial GraphQL API while maintaining uptime for 1000 users. Developed an utility library called CRUDimentary to help create uniform GraphQL APIs without boilerplate code.

EDUCATION

PURSUING UNIVERSITY	Bachelor of Science in Telecommunications and Informatics Faculty of Electrical Engineering and Computing	University of Zagreb
PERIOD	October 2011 — present (expected October 2018)	
Extracurricular	President of KSET - the faculty's student club. Managed the club's operations, handled communication with stakeholders, designed and managed events that impacted over 5000 students.	
Languages	Croatian (C2), English (C1), German (B2), Swedish (B1)
